

Guide for Dental Fees for General Dentists

January 2018

ALBERTA DENTAL ASSOCIATION AND COLLEGE

PREAMBLE

The fees listed herein are published to serve merely as a guide. No dentist receiving this list is under any obligation to accept the fees itemized. Any dentist who does not use all or any of these fees will in no way suffer in his/her relations with the Alberta Dental Association and College or any other body, group or committee affiliated with or under the control of the Alberta Dental Association and College.

A genuine suggested fee guide is one which is issued merely for professional information purposes without raising any intention or expectation whatsoever that the membership will adopt the schedule for their practices.

Dentists have the right and freedom to use any dental codes that are included in the Alberta Uniform System of Coding and List of Services.

Dentists may use these recommended fees to assist them in determining their own professional fees. A suggested protocol to follow in order to eliminate the possibility of patient misunderstandings regarding the fees for dental treatment is:

- a. Perform a thorough oral examination for the patient.
- b. Explain, carefully, the particular problems encountered in this patient's mouth. Describe your treatment plan and prognosis, in a manner, which the patient can fully understand. Assure yourself that the patient has understood the presentation.
- c. Present your fee for treatment, before the commencement of treatment.
- d. Arrange financial commitments in such a manner that the patient understands his/her obligation.
- e. If there is any question as to why this fee must be charged ... explain at this time.
- f. Describe, explain and note any conditions, which may require an additional fee.
- g. For the patient who requires a removable prosthetic service, two pertinent points must be emphasized:
 1. The length of time that adjustments will be provided, at no additional fee; and
 2. Whether or not the initial fee includes the cost of necessary relines.
- h. In all areas of treatment, the fee you charge should be based on the skill, judgment and experience, which you have attained, and on the degree to which these are applied in the treatment of your patient.

Guide Structure

1. The numbers assigned accurately describe the procedures provided and are divided into various categories of services. The inclusion of a code in a category does not restrict that procedure to a specific specialty. The classification is as follows:

01000-09999	Diagnosis
10000-19999	Prevention
20000-29999	Restoration
30000-39999	Endodontics
40000-49999	Periodontics
50000-59999	Prosthodontics - Removable
60000-69999	Prosthodontics - Fixed
70000-79999	Oral and Maxillofacial Surgery
80000-89999	Orthodontics
90000-99999	Adjunctive General Services

2. The numbers used to describe a service must accurately conform to the following principles, where the:

first digit	designates the	Category of service
second digit	designates the	Classification of service
third digit	designates the	Sub-classification of service
fourth digit	designates the	General service title only (when applicable)
fifth digit	designates the	Specific service

example: 21221

"2"	1221	represents the category "restorative"
2"1"	221	represents the classification "amalgam restorations"
21"2"	21	represents the sub-classification "amalgams permanent
212"2"	1	dentition" represents the service title "permanent molars"
2122"1"		represents the specific service "permanent molars one surface"

3. The **units of time** and/or the **letters** following procedures conform to the following principles:

Where: **Units of time** follow a procedure code, the designation is that of "fifteen minute intervals"

The letter "L" follows a procedure code, the designation is that of "**laboratory procedures extra**"

The letter "E" follows a procedure code, the designation is that of "**expenses extra**" (not intended to cover expenses already factored into the fee for the procedure)

The letters "I.C." follows a procedure code, the designation is "**Independent Consideration**" and is utilized where the procedure involves complexities which are too variable to designate a specific fee.

4. Where individual teeth/sites are designated use the FDI 2-digit notation and ISO 3950 Designation system for teeth and areas of the oral cavity:

Oral cavity	00															
Maxillary area	01															
Quadrant	10								20							
Sextant	03				04				05							
	18	17	16	15	14	13	12	11	21	22	23	24	25	26	27	28

	48	47	46	45	44	43	42	41	31	32	33	34	35	36	37	38
Sextant	08				07				06							
Quadrant	40								30							
Mandibular area	02															

* Designation of teeth
 First digit: Digits 1 to 4 represent permanent dentition and digits 5 to 8 represent deciduous dentition, clockwise from the upper right side.
 Second digit: Teeth in the same quadrant are represented by the second digit from 1 to 8, from the median line in a distal direction.

Conversion for anterior tooth coloured restorations from the G.V. Black classification to the surface classification system:

Class I	One surface restoration
Class III	One surface restoration, if not extended beyond the line angle. Two continuous surface restoration, if extended beyond the line angle.
Class IV	Three continuous surface restoration, (such as MIL, MIV or DIL, DIV), if not extended beyond the remaining line angle. Four continuous surface restoration (e.g. MILV or DILV), if extended beyond the remaining line angles.
Class IV Double	Four surface restoration (e.g. MIDL or MIL plus DIL), if not extended beyond the remaining line angles. Five surface restoration (e.g. MIDLV or MILV plus DIV), if extended beyond the remaining line angles.
Class V	One surface restoration
Class VI	One surface restoration (incisal), if not extended beyond the line angles

Posterior Teeth Classification:

A one surface posterior restoration is one in which the restoration involves only one of the five surface classifications (mesial, distal, occlusal, lingual, or facial, including buccal and labial).

A two surface posterior restoration is one in which the restoration extends to two of the five surface classifications.

A three surface posterior restoration is one in which the restoration extends to three of the five surface classifications.

A four surface posterior restoration is one in which the restoration extends to four of the five surface classifications.

A five surface or more posterior restoration is one in which both the lingual and facial margins extend beyond the line angle.

1. **One Surface Restoration, see figures 1, 2, and 3**

CLASS I

CLASS III (if not extended beyond the line angle)

CLASS V Vestibular or Lingual **CLASS VI** Incisal

2. **Two Surface Continuous Restoration, see figure 4**

CLASS III (if extended beyond the line angle due to caries, vestibular or lingual in a continuous fashion)

3. **Three Surface Continuous Restoration, see figure 5**

Three continuous surfaces such as MIL, MIV, DIL, or DIV, where the restoration does not extend past the remaining line angle.

4. **Four Surface Continuous Restoration (Typical Class IV), see figure 6**

Four continuous surfaces, such as: MILV, or DILV, line angle.

5. **Five Surface Continuous Restoration or Maximum Surfaces per Tooth, see figures 7 and 8**

Five continuous surfaces such as: MIDLV or a combination of MILV and DILV together on the same tooth

		ENDODONTICS		
		General Endodontic Procedures		
		There are certain Endodontic cases, which, as a result of a previous treatment, tooth position, anatomy and/or stage of development, require additional time and care. Such situations could merit an additional fee. Conservative root canal therapy includes treatment plan, clinical procedures with appropriate follow up care. Excludes final restoration.		
		Note: If Endodontic therapy is not completed it would be deemed reasonable to charge a portion of the suggested fee in relation to time expended in the procedure.

		Definitions:		
		Uncomplicated - Virtually straight canal penetrated by size #15 file		
		Difficult Access - Limited jaw opening, unfavourable tooth inclination, through complex restorations eg. Post/core buildups.		
		Exceptional Anatomy - Canal size same as uncomplicated, but made complicated by dens-in-dente or partially developed roots, internal/external resorption.		
		Calcified Canals - Unable to penetrate with size #10 file and not clearly discernible on a radiograph		
		Retreatment - Retreatment of previously completed therapy

			PERIODONTICS	
			In the treatment of periodontal diseases, variables such as the severity of the patient's periodontal condition and the distribution (i.e. extent) of the condition may require a relatively wide selection of therapeutic procedures and involve considerable variation in time and expense. In most instances the time required to perform a certain procedure could, and usually does, vary from one quadrant to another and therefore the amounts of time as outlined in the following guide could vary in the management of a particular case.	
41000		PERIODONTAL SERVICES, NON SURGICAL		
41200		ORAL DISEASE, Management of		
41210		Oral Manifestations, Oral Mucosal Disorders , Mucocutaneous disorders and diseases of localized mucosal conditions, e.g. lichen planus, aphthous stomatitis, benign mucous membrane pemphigoid, pemphigus, salivary gland tumours, leukoplakia with and without dysphasia, neoplasms, hairy leukoplakia, polyps, verrucae, fibroma etc.

		PROSTHODONTICS - FIXED		
		Initial description:		
		Fixed prosthodontic therapy requires the use of a variety of technical and therapeutic procedures depending on the nature of the problems presented in each individual case. The range of these procedures extends into many areas of treatment in order to provide comprehensive therapy for the patient. Many of the procedures used vary considerably in their difficulty, time, involvement and expense. The amount of time involved in a procedure may vary considerably from those outlined in the following guide. Fixed Bridges (each abutment, each retainer and each pontic, constitutes a separate unit in the bridge, with a separate code number)

			Anaesthesia, Conscious Sedation - a medically controlled state of depressed consciousness that allows protective reflexes to be maintained, retains the patient's ability to maintain a patent airway independently and continuously and permits appropriate response by the patient to physical stimulation or verbal command, e.g., "open your eyes". (includes pre-anaesthetic evaluation and post anaesthetic follow-up)	
			Any technique leading to these conditions in a patient would fall within this category of service. Conscious sedation is a varied technique which can require different levels of monitoring, in accordance with the Regulatory Authority Guidelines for the Use of Sedation and General Anaesthesia in Dental Practice. The Guidelines should be consulted and observed.

99000			LABORATORY AND EXPENSE PROCEDURES		
			(This code is used in conjunction with the "+L" and "+E" designation following specific codes in the guide. The addition of these codes are to facilitate computer or manual input for third party claims processing, personal records and statistics, providing one description for a specific procedure code.)		
			When filling out the third party claim forms, these codes must follow immediately after the corresponding dental procedure code carried out by the dentist, so as to correlate the lab expenses with the correct procedures.		
		99111	"L" Commercial Laboratory Procedures (A commercial laboratory is defined as an independent business which performs laboratory services and bills the dental practices for these services on a case by case basis)	+L	
		99222	"L" For oral pathology biopsy services when provided in relation to surgical services from the 30000, 40000, or 70000 code services.	+L	
		99333	"L" In-Office Laboratory Procedures (An in-office laboratory is defined as a laboratory service(s) performed within the same business entity).	+L
